[recipient name was inserted here],

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Arlene Hoffman

Subject: If sunset UNEP protect ELP!

For UNEL to work, an **ATT** or Sprint has to be able to sell DSL on its leased line. Otherwise, the Bells just have a different type of monopoly, a bundling monopoly. The Bells are saying after the leasing of a line, they don't have responsibility of provisioning DSL on it (even though **ATT** couldn't do it themselves). Don't let the Bells drag their feet and hide behind '3rd party billing' claims.

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Nancy Hixson

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service. I see a lot of good jobs being lost to lower paying ones and the service is worse because the new guys don't fix a problem just pass it off to the lease company.

I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Ralph Fellows
